

GILBERT AARON P. ADANE

SENIOR SOFTWARE DEVELOPER

0954-450-4739 | gilbertaaronadane26@gmail.com | Valenzuela City

WORK EXPERIENCES

Core Developer | LBC Express Inc.

August 2024 - April 2026

- Developed and enhanced existing APIs and frontend features for multiple LBC Express web applications based on Business Unit CRF requirements.
- Implemented new modules and system improvements according to business needs and project specifications.
- Utilized React.js and Node.js for frontend development and system integration.
- Developed and maintained C# Web API services for backend logic and data processing.
- Supported mobile and low-code development using FlutterFlow, focusing on API integration and data consumption.
- Collaborated with cross-functional teams to deliver system enhancements, bug fixes, and application optimizations.

Senior Software Developer | LifeStrong Marketing Inc.

June 2023 – July 2024

- Led and mentored junior and mid-level developers in project execution and technical development.
- Managed and implemented CRF (Change Request Form) requirements from various departments within a Warehouse Management System (WMS) environment.
- Developed and enhanced system modules using React.js for frontend development and C# for backend/API integration.
- Supported and maintained legacy systems built in Native PHP.
- Ensured code quality, proper team coordination, and timely delivery of system features and enhancements.

Mobile Developer | MegaMobile Inc.

December 2022 – May 2023

- Developed and integrated AI chatbot features for web applications with CMS support based on project requirements.
- Contributed to major projects including the Wendy's website CMS and Conti's website CMS, supporting content management and customer interaction features.
- Developed and maintained mini-games for the Rakuten Viber platform, including Flames, Zodiac Compatibility, and Basketball Shot.
- Utilized PHP Native, PHP CodeIgniter, and PHP Laravel for backend development and web/game application logic implementation.

IT Instructor | STI Muñoz

February 2021 – December 2022

- Taught subjects related to mobile development, web design, web development, and Object-Oriented Programming (OOP).
- Served as a Capstone Thesis adviser, guiding students in system planning, development, and documentation.
- Mentored students in applying programming concepts and best practices in real-world project development.
- Provided academic support, technical consultation, and project feedback to help students successfully complete final requirements.

Full Stack Developer | Lexo Manufacturing Corporation

September 2019 – December 2021

- Developed and maintained various web applications based on department requirements and CRFs (Change Request Forms).
- Created API integrations and customizations for SAP HANA and SAP Business One using C# for data processing and API communication.
- Developed and implemented user interfaces following SAP Fiori standards using Node.js.
- Worked on system enhancements, data retrieval, troubleshooting, and customization requests based on business requirements.

Reports Developer | Teleperformance Philippines

June 2018 – August 2019

- Developed KPI and reporting applications integrated with Avaya telephone systems to monitor agent performance and call metrics.
- Retrieved and processed call data such as call duration and agent activity from MySQL/XAMPP databases for reporting and analytics.
- Developed APIs and backend services for account-specific data references and system integrations.
- Built and maintained web applications using PHP CodeIgniter, PHP Laravel, MySQL, HTML, CSS, and JavaScript based on business requirements.

Software Engineer | Golden Aurum System Solutions Inc

May 2017 – May 2018

- Developed RFID software-to-hardware integrations using C# WinForms with Impinj Speedway Reader devices for RFID tag and card reading.
- Implemented and configured RFID solutions using Zebra Technologies RFID handheld scanners developed in Java (Eclipse IDE).
- Developed web applications and a Queueing Management System for multiple Bench store branches using Native PHP, PDO, MySQL, HTML, CSS, and JavaScript.
- Performed system testing, troubleshooting, maintenance, and provided client support for both desktop and web applications.

TECHNICAL SKILLS

Web Development

- OOP – CodeIgniter | Laravel
- ASP.NET – C# | MVC

Application Development

- VB.NET
- C#
- .NET Frameworks

Backend Development

- MySQL
- MSSQL
- SAP HANA

API Development

- REST API
- SOAP API
- Node.js

Frontend Development

- React.js

Tools and Version Control

- Jira
- Git
- Subversion
- Azure Devops

EDUCATION

Bachelor of Science in Information Technology

Global Reciprocal Colleges

Caloocan, Metro Manila

June 2013 - April 2017

ACHIEVEMENTS

- **Best in Capstone**
- **Best in Practicum**
- **Best in Android Developer**
Global Reciprocal Colleges | April 2017
- **Q1 Top Performers**
Teleperformance Philippines | April 2018

CHARACTER REFERENCE

- Available Upon Request
