### Professional Summary

Motivated Junior Developer with a solid foundation in full-stack web development, object-oriented programming, and database design. Proficient in JavaScript, React, Node.js, and SQL, with hands-on experience building web applications through personal and academic projects. Quick learner with strong problem-solving capabilities and a passion for writing clean, efficient code.

### Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Python, SQL, C++
- **Frameworks & Libraries:** React.js, Express.js, Bootstrap, Tailwind CSS
- **Tools & Databases:** Git, GitHub, PostgreSQL, MongoDB, Postman, VS Code
- **Concepts:** RESTful APIs, Agile/Scrum, OOP, Responsive Design

### Featured Projects

#### Task Management Dashboard | *React, Node.js, Express, MongoDB*

- Developed a full-stack task management tool enabling users to create, update, and prioritize daily tasks.
- Implemented user authentication using JWT and secure password hashing with bcrypt.

- Designed a responsive UI with Tailwind CSS to enhance user experience across mobile and desktop devices.

### **E-Commerce API Service** | *Node.js, PostgreSQL, Postman*

- Built a RESTful API to manage product inventories, user orders, and shopping cart operations.
- Optimized database queries, reducing average response time by 15% during localized testing.
- Documented API endpoints using Postman to streamline front-end integration.

## **Education**

### **Bachelor of Science in Computer Science**

State University | Graduated: May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Web Development, Database Management Systems, Software Engineering.

## **Experience**

### **IT Support Specialist (Part-Time)** | State University Tech Helpdesk

*September 2025 – May 2026*

- Assisted over 100 students and faculty weekly with network connectivity, software installation, and hardware troubleshooting.

- Documented common user issues in a central knowledge base to streamline future ticket resolution.
